OWENS IGNATIUS LAVALL JR

Software Engineer and Tech Entrepreneur

About Me

I am a software engineer and tech entrepreneur with a strong background in programming, web development, digital marketing, and project and product management. I earned a Bachelor of Science in Information Technology & Software Engineering from Notre Dame University.

I develop responsive and user-focused digital solutions using technologies such as Python, HTML, CSS, JavaScript, C++, C#, and Bootstrap. I also have practical knowledge in CS Core network operations, gained through hands-on experience supporting mobile network infrastructure.

My experience in digital marketing and critical problem-solving enables me to create solutions that work effectively and deliver real impact.

I am passionate about innovation, continuous learning, and building solutions that improve how people and businesses operate.
